## What is Worldmapx?

### The First And Largest Map-based Society

Worldmapx is a cutting-edge visionary approach that has the potential to revolutionize our approach towards marketing. We have a vision of creating a fully functional virtual world, and we worked for years before finally turning this dream into reality. Worldmapx is a pragmatic world with every detail as precise as in the world we live in.

The exact pieces of land are up for sale. We offer you the opportunity to purchase land, which you can either use for marketing your brand or resell it and make revenue. We use state-of-the-art technology to accurately scale the world and create a digital grid that allows users to go through the exact dimensions.

Regularly paying money for ads is quite a burden. What if you had an ad spot that you permanently owned and could use for as long as you pleased? Worldmapx can make your wishes come true. Landowners can post advertisements on their lands, including images, text, and website links, so that their businesses can profit from their ownership.

In a well-established map-based network, placing your advertisement on part of the world's map is the perfect marketing tool. Since your land is visible for everyone to see, those visiting your land and hovering around it can have a clear view of your advertisement placed on the area.

If intrigued, visitors can also visit your website by simply clicking on your land. This feature will take marketing to a whole new level, Don't waste this opportunity and get your hands on your dream land before someone else does.

### A New Era of Advertising Spaces

Worldmapx uses an all-new, all-different advertisement system. Landowners can use the entire area of their land on the map to post images, links, or even advertisements as they like. With a more online presence, ads will be more valuable as they engage with ads and each other.

People from around the world will have access to visiting your owned land.

For instance, you purchase the whole state of Massachusetts, hundreds of thousands of locals and visitors will visit the area just out of the curiosity of seeing their home state. In this regard, you will get unlimited advertising, and your company could reach a far wider audience than traditional digital marketing.

Besides, you have another money-making option that you can apply. Just like billboards are leased to advertise in return for money. Similarly, you can offer your land to people around the world for marketing their services. As the target audience will be massive, you could quickly charge reasonable amounts for renting your land.

### Be the Sole Owner of Your Land

Worldmapx allows you to be the only owner of your land. Thus our tagline- built to last. Users owning the land will have lifetime ownership, free to buy, sell, and lease as they please. You have complete authority over the land you own.

You can use it for marketing your services you offer in real life, or you can use your land as billboards and charge other people for selling their services via your platform. As the concept is geeky and technological, it has the interest of Generation Z.

And when the coming generation is interested in investing, the project is bound to reach new heights.

For instance, if you live in New Jersey along with millions of other Americans, you need to purchase the land as soon as possible. Otherwise, you would wake up to see that your desired ground is no longer available.

For instance, you purchase the whole state of Massachusetts, hundreds of thousands of locals and visitors will visit the area just out of the curiosity of seeing their home state. In this regard, you will get unlimited advertising, and your company could reach a far wider audience than traditional digital marketing.

Besides, you have another money-making option that you can apply. Just like billboards are leased to advertise in return for money. Similarly, you can offer your land to people around the

world for marketing their services. As the target audience will be massive, you could quickly charge reasonable amounts for renting your land.

### Own And Sell Land Virtually – A Dream Come True

Owning and selling land has never been easier. Now anybody can virtually own land on the most extensive advertising map in the world!

Payment can be made using cryptocurrency to make a one-time investment. Users can also sell land to each other via cryptocurrency. This virtual trading is without a doubt the future of marketing.

You can buy the most renowned places on earth like Tokyo, Shanghai, and England. Once you have gained possession of the land, consider it your asset. As time passes and more people get the hand of virtual lands, they will be willing to pay to purchase their land of choice from you.

### TAKE LANDS AND PUT YOUR IMAGE, WEBSITE OVER THEM

Worldmapx provides a unique way to connect with the world. Comprising of a map-based network, it is based upon real administrative divisions around the globe. Just like we have our continents, countries, and cities, Worldmapx has the same.

There is a New York and a Los Angeles on the virtual world you can gain possession of. The concept is futuristic and might seem like a long hop at first. However, once you get its primary goal, the only regret you will have is not buying more land when the prices were down.

As there is only one New York on the map, only one person can buy it from anywhere worldwide. Therefore, the longer you wait, the greater the chance of losing a prized land piece.

361664

Lands to invest

### [An Incredible Social Network](#)

Worldmapx operates essentially as a social network- but unlike any other social media network, it is entirely map-based.

Landowners will each have a card showing the status, images or a website preview, history log, and visitors profiles.

Furthermore, they can visit each other's lands and see how many people have visited their land. These features increase reach and online engagement.

Landowners can also interact with each other and the people that visit their lands. You can also share your grounds on Facebook, Instagram, and LinkedIn for people to see!

### [Get more traffic to your website](#)

We provide land owners the opportunity to add a preview of their websites in the land content to increase the traffic.

all you have to do is pasting your website URL and let Worldmapx do the rest for you.

You don't have your own website yet? No problem,we can build one for you

### [Gifting Lands](#)

Giving gifts to your loved ones has never been easier! Whether it's a birthday, a holiday, or even if there's no special occasion- what better gift than a piece of land from the largest map-based society.

Users can gift lands to each other after purchasing them. The gifting process is not considered a sale but rather a feature that landowners can use. The process is relatively simple: a gift icon appears on the land after purchasing it, and using that icon, the ground can be gifted, along with an image and a message, to any other user. There's no better way of expressing love to someone than gifting them valuable land!

### Share you lands

it is time to tell everybody about your lands. This is how your land appears on social media websites like LinkedIn, Facebook, Twitter after sharing your URL.

### Worldmapx- an Investor's Platform

Landowners can profit by selling the land they have acquired to other users, as they determine their land value for future sale. Each time land is sold, its value increases. With the online presence going up and an increased amount of online traffic and usage, these landowners are bound to be in possession of significant assets.

What's more, landowners can also rent their land to someone else to place advertisements for the landowner's profit.

### **One price for all lands and cities**

immediate use to advertise for your business/ideas

Lifetime ownership of properties

Reselling, gifting, and renting features

External links and website viewer inside the land

### Worldmapx Roadmap & Timeline

Worldmapx is still in its inception, and there is a long way to go before the land is actually traded on the Worldmapx map.

The roadmap for Worldmapx consists of three stages that will lead to the site's proper usage accomplishing its full potential.

#### Mid-2021 to mid-2023

The landholdings phase: This phase's goal is the rapid growth of users and their digital land acquisition. Our goal is for users to acquire 1% of the total land (around 3000 lands) in this phase. After this goal is achieved, the next step begins.

#### Mid-2023 to 2025

In this phase, our lands will be open to trade within the system. We use a smart contract trading system (blockchain-based) to maintain security and make transactions via cryptocurrency. Users will be able to trade land with each other.

In this phase, we expect an apparent increase in the land price in proportion to the overall buying and selling operations on the site.

#### 2025-2027

The phase in which interactive societies develop.

Following the arrival of users and visitors to large areas on the map, landowners have the right to build on their land and invest through interactive societies.

Societies shall mean using land or a group of land within federations for purposes whose objectives cannot be limited, as they are subject to full control by their owners.

## Worldmapx (WMX)

### Introduction:

WMX is the official token of worldmapx.com

Worldmapx is a world-map-based social network and advertisement system with more than 300,000 pieces of land. Each land is considered as an independent area where Landowners are free to post images, share website links, advertise, gift lands, or even resell them on the platform itself.

In 2017, We developed this world-map-based social platform using modern technologies without relying on google maps or any other service. In 2021, Worldmapx was finally launched.

### The official token of Worldmapx

WMX Is a token built on Binance smart Chain network (BEP20)

### Technical Details:

Name	Worldmapx
Symbol	WMX
Decimals	12
Total supply	10,000,000,000
Address	0x3E7541FD5B0b60790fBC3c90FEe192ab5A454741
Creator	0xECCdAD9005b8F10dEbfAB8d8134F8a843c66cd5B

### Token distribution:

15% Locked

30 % Liquidity pool

5% Worldmapx development

3% Worldmapx airdrop

2% Private Sale

45% Pre-sale

Transaction hash for locking the liquidity:
